

# AFRICAN MAHOGANY

*Khaya Ivorensis*

Khaya Ivorensis is the highest quality lumber in the African Mahogany family, and is considered an acceptable and cost-conscious alternative to Genuine Mahogany (*Sweitenia Macrophylla*). Harvested from Central Africa, our Khaya Ivorensis is known to offer a more consistently uniform color, and an evenly textured grain, compared to other species of Khaya. This is an excellent product used to produce high quality millwork, moldings, and furniture, showcasing its deep, rich color and grain.

## **Appearance & Grain**

*Pale Pink to Reddish Brown with some streaks. Darkens with age.  
Straight to interlocked grain, medium to course texture.*

**Fun Fact:**

*When finished and sealed, African Mahogany is chatoyant, meaning it appears to change color as the light reflects against the surface at different angles.*
