

# MAKORE

*Tieghemella heckelii*

Our Makore is harvested from Western and Middle Africa and is commonly used in Millwork applications such as furniture, cabinetry, musical instruments, and other small wooden specialty objects. Makore is very durable and has good insect resistance. The heartwood is pink or reddish brown, sometimes with darker streaks and mild color variation. Figured grain patterns are also not uncommon.

## **Appearance & Grain**

*Uniform Pink or Reddish Brown, Some Streaks of Varying Colors.  
Figured and Straight Grain Patterns, Fine Even Texture.*

#### Fun Fact:

Makore has been sold under the trade name of Cherry Mahogany, although the wood is not closely related to any of the species in the Mahogany Family.
