

BLOODWOOD

Brosimum rubescens

Our Bloodwood is sourced from South America and is commonly used in Millwork products such as trim, inlays, furniture, musical instruments, and turned objects. It is very durable and has good insect and borer resistance. Bloodwood's heartwood can be a vivid red, darkening over time to a darker brownish red with exposure to light.

Appearance & Grain

*Bright Vivid Red, Darkens with Exposure to Light.
Straight or Interlocked Grain, Fine Texture.*

Fun Fact:

The Bloodwood tree got its name because of the dark red color liquid it produces from its wood.
